

ROCK YOUR SOCKS!

3/21/2018

WHY DO WE WEAR CRAZY SOCKS ON WORLD DOWN SYNDROME DAY?

Almost everyone has 46 chromosomes, but people with Down syndrome have 47—they have 3 copies of the 21st chromosome. Check it out in the picture below! By wearing crazy or mismatched socks on March 21, we are showing everyone that being different can be fun! When people ask about our cool socks, we use that as an opportunity to tell them about World Down Syndrome Day and the special people in our lives who rock their extra chromosome!
